VERUM COIN

INTRODUCTION

Blockchain technology is improving, and coins created on its basis are becoming more and more popular.

People who understand digital currencies know how important it is to keep track of the crypto market in order not to miss the emergence of new promising crypto coins.

These monetary units allow not only to save but also to increase the capital.

The beginning of 2022 was marked by the appearance of a new promising coin. Verum Messenger launched their new crypto - Verum Coin (VERUM)

VERUM COIN

PROJECT DESCRIPTION

Verum Coin stands as a decentralized digital currency designed for swift, low-cost transactions across the globe. The security of the network is ensured through robust mathematical principles, granting individuals greater control over their assets.

With accelerated transaction confirmation times and enhanced storage efficiency, Verum Coin strives to redefine the landscape of peer-to-peer transactions.

Verum Coin ensures user anonymity through advanced cryptographic techniques.

VERUM COIN

Verum Chain (VERUM)

- *Own blockchain*
- *Proof-of-Work (PoW) consensus*
- *Script mining algorithm*
- *Maximum supply: 84,000,000*
- *Mined Coins (Mar 2024): 3,536,650*
- *Blockchain Explorer: [Verum Chain Explorer](#)*
- *Market Cap: \$396.658M*
- *24HR Volume: \$2,480,197.25*

Binance Smart Chain (BEP20)

- *Total supply: 1,000,000,000*
- *Circulation Supply: 93,405 VERUM*
- *Contract address:*
0xE6e4D9E1ddd783b6BeEccC059ABc17be88EE1A03
- *Smart contract [source code](#)*
- *Blockchain Explorer: [BSCScan](#)*

VERUM COIN

LEGAL COMPLIANCE

Verum Messenger LTD and its ecosystem are registered under the jurisdiction of United Kingdom, ensuring legal compliance with local financial and securities laws.

AML/KYC Procedures

To comply with global financial regulations, Verum Coin website integrates robust AML (Anti-Money Laundering) and KYC (Know Your Customer) procedures for the token holders. Users participating in token buying are required to undergo identity verification.

Smart Contract & Blockchain Audit

Security audits are crucial for maintaining transparency and protecting users from vulnerabilities. Verum Coin has undergone an external security audit by Cyberscope, ensuring the reliability of its smart contracts.

ABOUT VERUM MESSENGER

Verum, a messenger that guarantees privacy. You don't need a SIM card to use Verum Messenger. No phone tethering. The app has built-in VPN and end-to-end encryption.

When you first get to know the application, you will create an individual key pair and you will have a unique identifier. And the Verum developers have solved our eternal problem – if someone takes a screenshot in the chat, you will immediately find out about it.

End-to-end (E2E) encryption is used in every chat by default. Even the creators of the application cannot access users' conversations.

End-to-end encryption technology is a method of the information transmission where only the users participating in the chat can view the messages. As a result of using this method, other people cannot obtain cryptographic keys.

Another unique feature of Verum Messenger is the built-in eSIM, which allows you to connect to mobile internet without a physical SIM card or roaming charges. For those who frequently travel or work in different countries, this means always staying connected without the need to switch operators or search for Wi-Fi hotspots.

VERUM COIN

ROADMAP

March 2020

Verum Messenger project was launched.

June 2021

Release of iOS and Android Mobile Applications for reliable trading. Was added more than 500 trading pairs.

February 2022

Verum Coin (VERUM) First Sale Round

December 2023

Partnership with main world exchanges for the development future ecosystem

May 2024

Priority sales opening for major coin holders

1st Half of 2025

Listing at Top-1 Tier Exchanges

VERUM COIN

MINING OPPORTUNITY

In the world of cryptocurrencies, a unique opportunity has emerged to earn without specialized equipment - simply using the Verum Exchange mobile app.

It's the first currency converter to introduce mining, opening doors for everyone interested in entering the world of cryptocurrencies.

As a reward, miners receive Verum Coin directly to their crypto wallet, which is automatically created upon app authorization.

Miners can easily withdraw Verum Coin to exchanges such as BitCoinPay Trade or Crypto Bank, or keep them in the crypto wallet and wait for the price to rise.

VERUM COIN

MARKETING & DEVELOPMENT

Verum team have an in-depth plan for the use of Development and Marketing funds. There will be an ongoing emphasis on project development, with a significant portion of this being completed at launch.

Verum will not be focussing its marketing through the use of Cryptocurrency Influencers, but rather through press releases, and promotions of the projects that are developed.

There will also be a particular focus on developing collaborations and partnerships with other projects and innovators in order to build our community, and awareness of Verum through reputable sources.
